LIGHTLINX®

ANYWHERE, ANYTIME, UP-TO-DATE.
THE LIGHTLINX® ONLINE PORTAL BY RP-TECHNIK

LIGHTLINX® is the new web portal of RP-Technik that offers a new overview of your emergency lighting installations. It tells you which projects are located where, as well as their current status. From configuration, through existing messages, all the way up to complete inspection test reports – LIGHTLINX® helps you keep track of everything.

MADE IN GERMANY

RP-TECHNIK
PART OF RP-GROUP

LIGHTLINX®

- RP emergency lighting systems store their configurations and inspection test reports in the LIGHTLINX® Cloud*

- The LIGHTLINX® Portal displays all information regarding the installations

- Filtering and sorting of the installations by system status, region, etc.

- Ideal for planning maintenance trips and drafting documentation from the office

- Storage of master data and configuration of RP emergency lighting installations
- Storage of device data, operating mode, and group information
- Storage of event logs and inspection test reports

REGISTRATION, ACCESS

- Registration and login at: www.lightlinx.com
- To complete the registration process, it is necessary to enter the product code provided with the supported RP products
- Access is initially only granted to your own installations that you have set up yourself
- Users may share installations with other users (such as colleagues, business and sales partners) by granting them access rights to their installations.
- Installations and the respective access rights may be handed over completely and directly between users (e.g. from the installer to the owner).

SUPPORTED PRODUCTS

- RP Wireless Basic (Android or iOS tablet or smartphone required for set-up)
- RP Wireless Professional

*LIGHTLINX® support only for certain RP products
