

Art.-Nr: LDM25 charging module charging module LDM25

The LDM25 charging module is the core charging unit for emergency power supply systems of the MC series. It features a processor-controlled charging curve compatible with multiple battery types (OGiV, OPzS/OGi, OPzV, NiCd) and meets all major standards including EN 50171 and EN 50272-2.

With selectable charging currents (0.5 A, 1 A or 2.5 A), integrated temperature and voltage monitoring, and Plug&Play system recognition, the LDM25 offers flexible installation. Independent battery monitoring, overvoltage protection, and LED indicators ensure reliable operation at all times.
